

Communities of Influence

Improving healthcare through conversations and connections

Alison Donaldson, Elizabeth Lank & Jane Maher

Published in 2011 by Radcliffe Publishing

SUMMARY OF CONTENTS

Introduction – a fresh approach to improving services

Encouraging change from the ground up

1 – The power of the collective voice

How a charity known for its nurses came to work with general practitioners

2 – Making the invisible visible

The importance of tracking life and achievements of communities over time

3 – Working with and through doctors

How a community of GPs made a difference to patient care

4 – The social life of documents

Making sure written products of communities get noticed and used

5 – Hybrid creatures

A novel way of bridging the gap between research and service improvement

4 – Cultivating a lively community

The role of the supporting team in helping a group become more influential

5 – Involving lay people as partners

How patients joined a professional community and helped shape new services

8 – Playing a long game

Benefits and risks of working with communities of influence over time

Postscript: a writer's personal reflections

Suggestions for further reading
